*The new Liquid series of Windfeathers is now available!  
Liquid feathers are made from a visually stunning new fabric woven from a super highly polished polyester thread. The result is a fabric that has higher light reflecting qualities than silk with the same rippling and airy lightness. But unlike silk, Liquid Windfeathers are perfectly suited for outdoor use with unusually high fade tolerance and durability.*

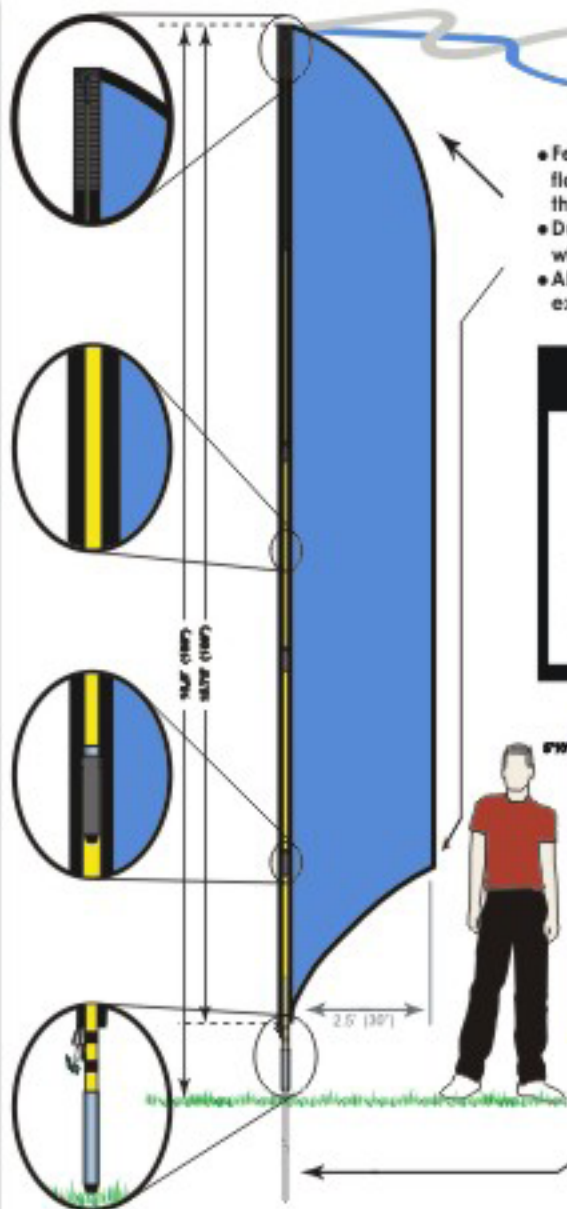

*Available in 7 stunning colors.*

*Each Liquid Windfeather comes complete with everything needed for a complete setup:*

- Windstinger™ reinforced epoxy fiberglass pole.*
- Patented Grounder™ ground washer.*
- 5/8" solid fiberglass groundstake.*
- Deluxe fabric carry bag.*

Get in the Wind.

12' streamers add eye catching visual appeal & increased movement.

- Feathered shape increases durability of the flag by eliminating its two weakest points; the top and bottom right-hand corners.
- DuPont® Solarmax nylon® flag resists fading with UV inhibitors.
- Also features nylon edge reinforcement for extra durability.

### Our Guarantee:

1. Windfeathers® will withstand any appreciable fading and ripping for a minimum of 6 months under normal use and correct installation.
2. We will replace any broken or damaged section of our poles at no charge.
3. Digitally printed Windfeathers® will not bleed or have color transfers.

### Assembly & Installation

Pole identification banding and modular stacking system makes assembly simple. Total assembly and installation can be completed in a matter of minutes!

Thick 5/8" solid fiberglass ground rod enhances the pole's flexibility and is safer to install than a metal ground stake.
